

How Elites Will Create a New Class of Slaves

(2022/11/05)

<https://www.youtube.com/watch?v=w-d3jFIgxdQ>

Description Section:

Journalist Whitney Webb has worked to uncover some of the most dangerous stories of our lifetime, and she joins Glenn to reveal just how eye-opening it's been. Her new two-volume book, "One Nation Under Blackmail: The Sordid Union Between Intelligence and Crime that Gave Rise to Jeffrey Epstein," examines Epstein's elaborate network of corruption and power, from Bill Clinton to Ghislaine Maxwell and many more. Her research into transhumanism has given her a terrifying perspective on the World Economic Forum and tech elites, including Elon Musk. And she tells Glenn the dark truth about Biden's push for electric vehicles that she noticed while living in Chile.

0:00

a campaign of Lies can hide anything and with the magic of disinformation

0:06

mysterious deaths can be quickly brushed off as suicides even when all of the

0:11

details don't add up and there's so many stories now that just don't add up

0:16

public assassinations can happen right in front of you and you'll never know who was really behind it or why as long

0:24

as the powers that be push a great narrative the same lie over and over and

0:29

over again Jeffrey Epstein infiltrated the highest ranks of every sector of power you are

0:37

going to learn a lot about the world today he was into law enforcement art

0:44

Wall Street Silicon Valley big business real estate philanthropy media academics

0:50

and banking he even wormed his way into high fashion he hung out with Nobel

0:56

prize-winning scientists and billionaire arms dealers movie directors famous actors journalists and lots of

1:02

politicians including heads of state not just here in America and he has a very

1:08

special bond with Bill and Hillary Clinton we still don't know who took part in his

1:15

many crimes and they are vast this is nothing short of political terrorism

1:20

theater facilitated by the media today's guest as you will hear

1:28

I just finished it and you will hear halfway through

1:34

I say maybe it's halfway through I said I think this is the most important hour

1:41

I have ever been a part of in broadcast I've done this for 45 years this is the

1:50

most important person and hour you can you can spend

1:56

today's guest has a gift for locating power and hunting it in its darkest

2:02

corners she realized that Epstein was not an anonymous an anomaly she is

2:08

somebody who has written two volumes on just him but you will see it is

2:14

connected to entire networks of power and influence a web of Elites who

2:20

operate under the principle that rules are for other people her two-volume book

2:25

One Nation Under blackmail the sordid Union between intelligence and crime

2:30

that gave rise to Jeffrey Epstein is out keep your eye on this one she is sharp

2:38

she is a massive threat to powerful people if people will listen and do

2:45

their own homework and just explore what she's saying the game is up

2:53

she's the kind of writer who reminds the elites that they're not

2:58

actually above rules and we're not all a bunch of Rubes please welcome Whitney Webb

3:07

I can't wait to get into this podcast with you imagine what it would be like if you could just flip a switch and make

3:14

every order that gets into your home just go away in a few seconds if it sounds too good to be true believe it or

3:20

not this one is not the new Eden Pure thunderstorm air purifier the

3:26

thunderstorm isn't just your garden variety air purifier it uses powerful O3

3:31

molecules that actually hunt odors down and Destroy them it also kills viruses

3:37

mold and so much more and they get to all of the places that you can't reach you know behind an under furniture for

3:44

instance so you're getting a clean fresh smelling air all the time I have a very

3:50

big dog in it this time of year that very big dog is wet a lot I hate that

3:56

we have Eden Pure thunderstorm threes in our home they have a three pack right now for your whole home protection you

4:04

get three units for under 200 it's an amazing deal it means that you can not

4:09

only keep your house smelling fresh all year long uh but you can put one in the

4:14

truck you can put one in your refrigerator they make one for refrigerators the fresh air you're

4:20

breathing is good fresh air find out edenpuredeals.com

4:26

edenpuredeals.com put the discount discount code Glenn 3 and Save

4:32

[Music]

4:38

thank you [Music]

4:45

welcome I am a huge fan of your work um uh you have covered some of the most

4:54

important stories I think um in my lifetime wow thank you and you

5:01

are so clear on all of them and most of these stories are the ones you can't get

5:08

answers on they're they're all the stories that the big and powerful want

5:13

to hide want you to not see what's really going on and it's

5:19

it's so frustrating because it's clear that these things are happening and

5:24

should be discussed you you worried ever about your safety

5:31

um no and the reason I say that is because I think you know um a lot of what we're facing is an

5:36

energetic and spiritual uh battle I guess you could say and

5:42

um I think in order you know if you're afraid of of these people yeah um you're giving them power over you and

5:49

I think really the only way to to win this is to have your commitment to you know what you're fighting for the good

5:55

about Humanity to be total right so good for you how old are you uh 33. you you write and

6:05

think and speak like you're 80 and very wise thank you you must have a good

6:11

parents um okay so I want to talk to you if we can in an hour I want to mention Bitcoin

6:17

get a little bit of that journalism transhumanism ESG the world economic

6:23

Forum we're not going to be able to get to all of it but we have to start with Jeffrey Epstein because the way you have

6:30

written about him it connects to a whole world of corruption yeah is he kind of

6:38

the Rosetta Stone yeah I think it's sort of like a meta Scandal you're looking at someone who

6:44

really had I guess for lack of a better metaphor had his hands and a lot of Pies right right so he was sort of at the

6:51

center of a lot of scandals but not necessarily at the top right I think he was more maybe middle management in a

6:57

sense but very Central to a lot of these things going on that sort of these um networks in which he

7:04

um in which he inhabits are involved in you know numerous acts of corruption simultaneously and he you know is there

7:12

involved in many of them but not necessarily at the top level right so was he was he a spy

7:19

I think he definitely had intelligence connections and there's a lot um you know to suggest that was the case

7:24

I think one of the most uh the earliest hints we heard of that was having a Secretary of Labor Alex Acosta under

7:30

Trump uh say that one of the reasons he was pressured into giving Epstein a sweetheart deal during his first um

7:36

arrest in in Florida was because he he had been told by unspecified actors that Epstein belonged to intelligence but

7:43

that's kind of you know what exactly does that mean was he an asset was he on the payroll which intelligence agency

7:49

multiple intelligence agencies when you have his close association with someone like Gillian Maxwell in the mix and her

7:55

father had affiliations with numerous intelligence agencies you know it really is an open question it was kind of a bad

8:01

guy reading your work about him and explain who he was uh so Robert Maxwell was

8:09

involved in many things but he definitely played a major role in undermining U.S national security by

8:14

selling bug software to nuclear Laboratories in the United States and this was directly facilitated by

8:20

well-known Statesmen in U.S history like Henry Kissinger for example and a lot of

8:26

the people I think that enabled him at least on the U.S side tend to be those that uh favor Global governance and you know

8:34

they kind of don't want the U.S to have that kind of Monopoly on on power because all of his family they were

8:40

killed in the Holocaust right right and so he he's in the west England he

8:47

survives becomes kind of uh William Randolph Hearst of

8:53

England yeah media Mogul sure yeah um and uh and then

9:00

betrays the west and that's not because he was on the other he wasn't on the

9:05

Soviet side he was on a global government side well I think there you have to look at this network and they've

9:11

evolved over time right uh Robert Maxwell is very close to the Eastern Bloc he had a very close relationship

9:16

with intelligence figures in the KGB and also Bulgaria he had a relationship with British intelligence and Israeli

9:22

intelligence and was involved in aspects of what later became known as Iran Contra which of course involves aspects

9:29

of U.S intelligence so I mean he had his hands and everything you know everywhere and everything and I think ultimately

9:34

people like him are interested in any deal they can make to advance their money and their power and their

9:40

influence they'll take it so Robert Maxwell was very interested in having his family be like the Kennedy family a

9:47

political power Dynasty and that's part of why he started moving into New York City around you know just a year or two

9:54

before he ended up dying and galane Maxwell was sent to New York sort of to be his Emissary wow and to the U.S and

10:00

he wanted her actually to marry a Kennedy and this is a test of two and you know past mainstream media reports and you know you can see his his efforts

10:08

to get her close to I think one of the sons of Robert F Kennedy um and also John F Kennedy Jr trying to

10:15

get her sort of in that social tier because he sort of saw that as you

10:20

know would Advance his power and also you know that of his children and I think if you look a lot at the psychology of Robert Maxwell he seems to

10:27

have had narcissistic elements and that could be because of the trauma of his past and a lot of times narcissistic

10:33

parents see their children as extensions of themselves and so you know he's looking at how to build an Empire and

10:39

using his children to that effect and you sort of see that with the psychology of Colleen Maxwell

10:46

was she part and parcel of from the beginning or

10:51

was she uh you know kind of a good girl idealistic comes over here you know

10:59

knows that Dad wants to put her into powerful positions but not shopping

11:05

women I I think it's a lot more complicated than that you have to look at her early history

11:10

um the favorite son of Robert Maxwell was originally Michael Maxwell he wasn't a vegetative state after a car crash I

11:16

think when he was 15 and that happened shortly after just a few days after galane was born so new her family

11:23

members and she herself have attested to that she was basically neglected for the first three years of her life and even developed a childhood anorexia

11:30

things like that and then you know not a few years after she becomes the favorite Child so she goes from having this

11:36

complete lack of Parental attention to being sort of showered in it by Robert Maxwell and that obviously has is going

11:43

to have a psychological impact on someone and in addition there's uh she was

11:48

basically managed by her father from a very early age he managed her tried to manage her

11:54

romantic life he tried to manage what job she would have and she was very dependent on him so when he is dead in

12:00

1991 it makes sense that she would attach herself to someone with a lot of the similar similar characteristics

12:06

right so Dad didn't know about Jeffrey Epstein wasn't alive at that point well

12:11

the allegation have been made by people that worked with Robert Maxwell um in the 80s that Jeffrey Epstein was

12:18

seen in his offices frequently in the United Kingdom and during that period of time it was known that Epstein was

12:24

active in the United Kingdom he was allegedly being mentored by a British arms dealer named Douglas
leese with a

12:29

British intelligence connections yeah first of all you wrote two volumes yeah

12:36

a thousand Pages yeah I mean that is crazy amounts of work yeah I had my son

12:41

was born in the middle of it so it was really crazy you were there for that I imagine when your son was
born

12:47

um so tell me a thousand pages and it's not there's no

12:53

fluff in it I mean it is it's dense it's very dense why is it nobody else is reporting on

13:00

this um well I guess I could I I don't really know exactly why that would be but the

13:06

the silence is very eerie about major aspects of the Epstein case

13:11

um you know it ended up being a thousand Pages because I was as I was writing about Epstein a lot of
the connections

13:16

that came up I was I was just you know increasingly aware that a lot of people in the American public

13:22

um you know a lot of the names I was coming across most people weren't going to be familiar with
correct you know um

13:28

Banks like the bank of credit and commerce International or BCCI the Scandal that involved or even
things

13:33

like Iran Contra people may have heard the name but don't really know what it involved so I figured I
was gonna have to go back and sort of explain that to

13:40

people so that type of context is a volume one of the book and um and also

13:46

the history of sexual blackmail and how it's been sort of an undercurrent in some past political scandals in American

13:52

history and how in in these sorts of networks in which Epstein was inhabiting that type of practice and exploitation

13:58

even of minors for those purposes was actually um disturbingly common so Epstein starts

14:04

to look less and less of a you know he's not an anomaly basically right um by the time you get through with

14:10

volume one and so volume two is sort of my effort to um you know dig up as much as I could

14:16

you know with stuff that's publicly available really about Epstein and also

14:21

his greatest benefactor Leslie Wexner and then also uh you know Colleen Maxwell okay so so uh this is just

14:29

there's a lot to discuss there's a lot to discuss here on just this because it's this goes to the Deep state or you

14:37

call it deep politics and it's been going on for a long time

14:43

but people I don't think realize that you know the born identity you know

14:49

those Jason Bourne movies that that is a reflection of some people's real lives I

14:55

mean it's a it's a totally fictitious story but those things do go on and

15:01

and I I I tell you I have I have felt for a long time with the just with the

15:08

NSA listening to everybody's phone calls if you're important in Washington

15:14

they're going to do everything they can to manage you to manage you yeah so if

15:20

you're not rock solid in who you are and what right and wrong really is they got

15:25

you yeah but even they don't you know today I think we've moved away from the type of

15:31

model that Epstein used for sexual blackmail it's an era of electronic blackmail and you don't even have to do

15:37

anything wrong they can just plant it on your devices and play gotcha that way so it's really an unprecedented situation

15:43

and a lot of these intelligence agencies as I know in the book you know really for decades have been totally out of

15:49

control um and you know I really start off the book talking about how intelligence agencies and organized crime in the U.S

15:56

got in bed together and really that symbiosis um you know it was originally Justified out of wartime necessity during World

16:02

War II yeah but it never stopped right right and it's um you know business is

16:07

business and some of these people in our own National Security State you know realize they could make a lot of money

16:12

working with organized crime and really shielding them and getting in on the spoils I guess you could say

16:20

good news and bad news here is the bad news first then we get right back into the podcast it looks like beef prices

16:26

are probably going to increase by another 20 percent early next year not

16:32

great nothing like a large increase in meat prices the largest in U.S history

16:37

to cheer you up well here is the good news good ranchers is letting you lock

16:42

in your price on all the meat you buy this November when you subscribe during

16:47

their Black Friday savings this is a chance to inflation proof your meat

16:52

budget and you're going to get 70 worth of free USDA Choice steaks and save an

16:59

additional 25 on every box when you subscribe so forget the high prices and

17:04

the low quality of the grocery store treat yourself and someone you love to good ranchers their award-winning

17:11

service and quality it's great for the holiday season remember visit goodranchers.com Glenn or use the promo

17:19

code Glenn at checkout to grab their best offer of the Year Black Angus is

17:24

one of the Premier breeds of cattle for high quality beef so don't have a normal Black Friday have a Black Angus Friday

17:31

with great steaks from good ranchers American Meat delivered

17:38

you know we think of in my idealistic years of thinking about

17:45

America I thought well we did some bad things yes and I'm not talking about slavery or anything else I'm talking

17:50

about things we did in war but we had you know we really didn't want to do those things

17:57

I'm not sure if any of that is true are the people involved in this stuff do

18:02

they recognize at all that this is evil or is this just business well I think when you're talking about an

18:08

intelligence agencies there's hierarchies so there's like people maybe low in different levels that may think

18:13

what they're doing is right and advancing American interests but then there's people at the top that aren't necessarily like that and it's about

18:19

advancing their own interests if you look at a lot of controversial intelligence operations and decisions

18:24

coups for example of the past a lot of it was justified as going against communist influence trying to to keep

18:31

that from growing but then some of these same actors like the Iran Contra types they ended up

18:37

getting involved with the Chinese government just a few years later in the 1990s and some of this blossomed into

18:43

what a lot of conservatives today remember is China Gate during the Clinton Administration and things like that so you know they really have no allegiance

18:49

to anything except uh their desire to grow their own money and power are we ever going to find out who's in

18:55

the black book I don't think so I think the FBI has been compromised from the very beginning uh in the book I talk a lot about J

19:02

Edgar Hoover he was blackmailed by the mob he realized the power blackmail had started using blackmail himself and you

19:10

know increasingly the FBI and I think it's very obvious to a lot of conservatives now comes in to cover things up and to you know go after uh

19:18

you know figures that they you know don't want to advance in their careers

19:23

or you know any sort of thing it's it's very um it's very complicated so what do

19:29

we do as a country when you know there needs to be massive investigations of all sorts of stuff Jeffrey Epstein being one and you know the government is

19:35

increasingly capable incapable of investigating itself especially when you're looking at the FBI or something

19:41

can we just go through some names like Alan dershowitz and Bill Clinton and

19:46

Donald Trump what were they involved in uh so

19:54

um so each of those cases is really different but if I'm looking at you know I guess the one that's gotten the mo

19:59

gotten the most attention obviously are the former presidents right Trump and Clinton as far as I'm concerned the

20:05

Clinton Epstein relationship is much more damaging than the Trump Epstein relationship but they're you know are

20:11

obvious reasons for concern uh in both of them and I don't think it's uh you

20:16

know I in in trying to be objective you know I can't absolve one or the other but are you saying are you saying

20:23

because one is more damage because people don't understand it's not just the horrific evil sex trafficking that

20:31

was going on it's also massive corruption and financial Financial

20:36

crimes and yeah and that's particularly glaring with the Epstein Clinton relationship you have someone like Jeffrey Epstein that described himself

20:43

in the 80s as a financial Bounty Hunter he was hiding or finding looted money for powerful people that's coming from

20:50

him and he said this to numerous people there's numerous source is attesting to this so obviously he was very

20:55

comfortable with the offshore Financial system Shadow Banking and all of that and then in the late 80s in addition to

21:02

becoming involved with Leslie wexner's finances he is involved in orchestrating one of the largest Ponzi schemes in U.S

21:09

history the other person he worked with in that Stephen Hoffenberg you know is arrested and goes to jail for that in

21:15

1993 Epstein's name is dropped from the case and he ends up at Clinton White House fundraisers

21:20

and one of those fundraisers is involved Hillary Clinton's effort to alleged

21:26

effort to refurbish the White House and this makes a brief appearance and Vince Foster's quote unquote suicide note the

21:33

only mention of Hillary Clinton in that suicide note is relating to her and Khaki Hawker Smith redecorating and how

21:38

there was nothing wrong with the finances there if you're um you know listeners are familiar with

21:45

the Vince Foster situation and how Hillary Clinton her office was involved

21:51

in finding the suicide note when there was nothing in the briefcase and all of that later it's very interesting the only mention of her name would be in

21:57

trying to absolve that particular fundraiser of you know any wrongdoing which might have been Foster's

22:03

responsibility and that's Jeffrey Epstein's you know one of his first interactions with the White House there's a picture of him shaking hands

22:09

with Bill Clinton at that fundraiser donor reception and only UK media

22:15

covered that when it came out last December I gotta tell you it's pretty stunning I only see stuff that I kind of

22:22

trust from UK now I read any if there's any scandal going on in America I trust

22:28

the Foreign Press more than I trust Harper well isn't it stunning that there's a picture of you know the claim has been for a long time that the

22:34

Epstein Clinton relationship only really began after Clinton left office and then you have a picture contradicting that

22:39

and it doesn't get any coverage so how does there's something else there obviously I was shocked to learn from

22:46

you that Ron Brown I I remember he was a guy who

22:51

was on a plane going someplace Croatia yeah Croatia and it crashed and and

22:56

everybody was like that's another Clinton murder and I've never really bought into the I mean you wouldn't have

23:02

to push me far but I'm a fact guy you know what I mean yeah show me the facts um

23:09

unravel to understand the Ron Brown situation because it's tied up with that what I mentioned earlier China Gate

23:15

which was uh very difficult even for Congress to investigate the man at the center of it who was also the man that

23:21

Jeffrey Epstein met with repeatedly at the White House named Mark Middleton he pleaded the fifth 28 times including uh

23:28

to the question is was he a foreign agent and pretty much every key figure they

23:33

tried to subpoena also pleaded the fifth and there was just um you know it was

23:39

very difficult to investigate and even the George W Bush Administration the

23:45

first invocation of executive privilege of Bush's president was among other things to block documents about Mark

23:51

Middleton being made available to Congress and the 911 happens and everyone forgets wow it's it's very

23:57

amazing because Mark Middleton was not a high-ranking guy he was uh an aide to uh Mac McLarty he

24:04

was chief of staff and then a senior advisor to Bill Clinton so why are you having the subsequent president stepping in for Mark Middleton

24:11

there's obviously a lot going on there because at the same time that Mark

24:16

Middleton is involved in China Gate he's meeting with Jeffrey Epstein and Jeffrey Epstein in that period of time is

24:21

arranging for the relocation of Southern Air transport the Iran-Contra Airline from instead of going from Miami to

24:28

Latin America it starts going from Columbus Ohio where Leslie Wexner is based to Hong Kong

24:34

so are those events connected I make a case for that in the book and if if true it's very very disconcerting because

24:41

basically you know to summarize China Gate you have a mass transfer of sensitive U.S military technology being

24:48

made to China it's being paid for by the PLA or the the Chinese military and Ron

24:54

Brown was at the center of that because the Commerce Department Commerce Department was signing off on you know

24:59

all sorts of so why was he then supposedly killed he uh shortly before

25:05

he was unexpectedly asked to go on a trade mission to Croatia he agreed to cooperate with an investigation into

25:12

this particular Network that was executing China Gate and the people on the U.S side that were facilitating

25:19

China Gate were people that were connected to the networks of longtime Clinton benefactors the riyadi family

25:26

and Jackson Stevens who you know were sort of political King makers for Bill

25:31

Clinton when he was governor of Arkansas it's how much crazy how much of what we

25:38

think we know is wrong or how big of a role is what we

25:45

think we know to what really is happening well I think there's been a major effort to control the media and

25:52

how much information gets to the American public about all sorts of things if you look at the Epstein case you're only allowed to talk about his

25:58

sex crimes from 2000 to 2006. don't look at his financial crimes or any of the

26:04

thing he did before the year 2000 is you know pretty much how mainstream media handles the case and that's pretty

26:10

you know there's a lot to find if you can go back farther so when you're you're looking let's just look at

26:15

Epstein for a second when you're looking at his circle of influence he is

26:21

somebody who's kind of recruiting just getting people on tape doing horrible

26:27

things or raising money so they're in the pocket right is that kind of his role I think that's part of it but at

26:34

the same time you know he's doing a lot of that he's also involved in financial Crim you know Financial crimes pretty

26:40

much throughout his career I mean that's the Common Thread from Epstein from the 70s right until his son know that if he

26:47

was working as an operation that would kind of be over I think it was known I

26:52

mean even in January 2020 you have John McCain's wife Cindy McCain saying we all knew what Epstein was doing right and

26:58

this is the wife of a senator with no direct connection to the Epstein Scandal so that means top people in our Congress

27:05

and Senate knew what Epstein was up to and nothing was done and so does that I

27:11

mean is there a big body count around Epstein yeah I think yeah I think there is to an extent uh Mark Middleton

27:18

who I just mentioned was found uh hung by the neck by an extension cord in May with a shotgun wound to the chest

27:25

um and it was ruled suicide in Little Rock Arkansas and a local Court ruled uh

27:32

pretty shortly thereafter that no video or you know photos of the scene could be publicly released

27:38

and this was only after you know Mark Middleton had been involved in China getting numerous other scandals but that

27:44

only happened just a few months after the visitor logs of him meeting with Epstein was released last December and

27:50

published by the UK's Daily Mail so that's one but that's one recently

27:55

you also have Jean-Luc Burnell who was a major uh facilitator of his uh sex

28:00

trafficking activities particularly when it came to the modeling industry um Turned Up dead in his prison cell

28:06

you've Epstein himself and then you have uh the son of Esther Salas who was a the judge overseeing the Epstein Deutsche

28:13

Bank case murdered at uh her home let's not just gloss over Epstein and

28:21

his death do you believe he hung himself I think the official

28:26

story is just uh I mean it's it's crazy uh personally because you know he he was

28:31

a tall guy he's supposed to have hung himself from something that's shorter than his standing height with like paper

28:37

thin sheets he would have had to curl up in the fetal position to hang himself and he's you're not going to do that

28:43

it's it's very uh it's logistically impossible we're supposed to leave all the cameras malfunctioned that night

28:50

um you know the prison guards were asleep it's a lot of coincidences

28:55

um so who would who who would we have to believe I mean that would have to involve

29:02

lots of government Lots sure but he belonged to intelligence and if you look

29:08

at you know someone like Robert Maxwell he died off of his yacht uh he had a lot

29:13

of ties to intelligence things were you know the walls were closing in on him and his own daughter Elaine Maxwell

29:19

thinks he was murdered uh by uh Rogue massage agents and Sicilian contract Hitman

29:26

and that's coming straight from his daughter that worked closely with him so if you you know if things get too hot if

29:32

you you know uh maybe work did work for them in the past but you become you know more of a liability than an asset you

29:39

know things sometimes happen every morning people all over the country wake up and live their lives

29:47

it's a land that today is still free they work hard they try to make a good

29:52

living they love their God their family and at the end of the night they go to bed as decent people that is the

29:59

American ideal it's an almost Limitless aim conceived in the hearts motivated by

30:05

Liberty and goodness and freedom and decency please believe me when I say your

30:13

not alone and your

30:18

you're you're not apt to find a clearer example of that kind of spirit then the

30:23

people who build make dream of and sell the products from grip six

30:30

they make several things but I want to talk about their socks for instance the socks when you buy them
you're

30:36

supporting American ranchers who raise specially bred sheep that will produce modern wool the kind of
wool that we

30:42

need that keeps you cool in the summer and warm in the winter the American

30:48

manufacturers who wash that wool process it and then weave it into socks that

30:53

will keep your feet warm in the winter all of it is happening right here this

30:59

is a group of American business owners who have accepted the risk that comes along with only using
American-made

31:05

products and American labor so help help us rebuild the dream keep our

31:12

community strong grip six check them out grip6.com grip6.com Beck and Save

31:21

I don't believe in the pizza gate conspiracy you know that there's an underground however

31:28

I I do think that there is real evil at the upper levels that yeah

31:36

we've been engaging in and all of us dupes out in the center of the country are like oh no you know I how much how

31:46

prevalent is the massive corruption and

31:51

the evil with well like I mentioned earlier the more

31:58

you look at the people that were around Epstein even before Epstein gets involved it becomes very clear that what

32:03

he was doing was not uh out of the ordinary for these particular groups especially like arms dealers like Adnan

32:10

khazoggi he had an alleged Harem of women that he used to Blackmail powerful people in the private and public sectors

32:16

on his yacht and all their sorts of types of people um Robert Keith Gray a PR executive that

32:24

started working for Adnan khazoggi around the same time at Jeffrey Epstein allegedly did has an alleged history of

32:30

sexual blackmail for the CIA and then you have allegations of Roy Cohn the

32:35

well-known New York mob attorney also being involved in sexual blackmail stuff begins working for Adnan khazoggi in

32:41

the same period of time in the 1980s I mean there are the more you look it's

32:46

it's quite uh it's prevalent but you know how prevalent it is I can't really say but it definitely does influence our

32:53

politics and that's disturbing is the is the Clinton Foundation involved in any

32:59

of this it's just so um I don't know exactly um you know those types of activities I

33:05

have no evidence for that and I haven't looked into it so I'm not going to say it's not happening but I I just don't

33:11

know because I haven't looked right um but when you like I mentioned earlier about the Epstein Clinton relationship

33:16

he goes from Ponzi schemes to Clinton fundraising then he's involved with a lot of the 1996 controversial

33:21

fundraisers that were investigated by Congress Clinton leaves office he's flying around in Epstein's plane setting

33:27

up the Clinton foundation and the Clinton Health Access initiative and even credits Jeffrey Epstein back in 2003 with designing a lot of the

33:33

philanthropy that became the Clinton Foundation specifically the HIV aids program so you have a Serial Financial

33:39

criminal creating basically the Clinton political slush fund Pro post presidency the the um have you seen any connections

33:48

in Ukraine there's this is just the hotbed of a lot

33:53

of really nefarious players yeah um I haven't looked into it specifically because a

34:00

lot of my timeline that I did for the book you know stops before years like 2014 when there was this you know

34:06

basically a coup um you know it was Victoria Newland and some of these people from the Obama Administration and all of that um so

34:13

unfortunately you know I haven't personally explored that but I think it's I mean even mainstream media before the recent uh conflict there was you

34:20

know pretty open about the corruption in in Ukraine so I don't know your politics

34:25

and it's not important to me what's important to me is your character and your work which is phenomenal

34:32

um but uh uh I'm guessing you and I don't necessarily agree on policies uh you

34:40

know maybe I don't know I just you know at this point I think my politics are I'm I don't want the government to be

34:46

run by organized crime and I think that's the starting point for most Americans let's start there right you

34:52

know that's what I was driving to is there are big things on the table that

35:00

no one's talking about and we're all focused on the little stuff they've used

35:06

to divide and conquer us this whole time and big things are happening and basically we are being herded into a pen

35:13

a techno feudalism yes slavery I don't know a lot of there's a lot of different names for it going around but it's not

35:19

good right and it's organized crime you know running the show at the highest levels and also people I mean yeah it's

35:29

just getting so dark and yeah you know I'm to the point where can you give me

35:36

nine of the top ten Bill of Rights you know what I mean do you agree with those give me some anything that is

35:44

all being destroyed all of them they don't mean anything anymore but those

35:49

are the things that can bring us together and they do I mean I'm sure

35:55

you're called a radical conspiracy theorist um

36:00

you know there's a difference between conspiracy theory and conspiracy facts

36:05

sure so I would call you conspiracy fact purveyor yeah uh I guess

36:12

so because conspiracy is a real crime and it's happening and it's been happening right and um you know a lot of

36:18

us are sort of fed this you know when we're in school and stuff sort of this naive I guess you could call it a fairy

36:24

tale version of History where there's no corruption everything's fine the mob disappeared decades ago nothing to see

36:31

here but that's uh not the real history of this country tell me before we leave

36:36

Epstein tell me why uh Maxwell's the life oh oh I think it's pretty

36:44

obvious she's going to cooperate with the people that supported that operation

36:49

and she's not going to spill anything she got moved from the prison where I think she was at the same prison where

36:54

Epstein died and now she's a what is has been described as a country club prison in Florida

37:00

uh that wouldn't have happened unless she was like yeah just leave me alone please I'll do whatever you want

37:08

all right let's let's uh I think she knows from her father's death who not true and who runs the show yeah

37:16

um how does this involve the regular person why should the regular person care about this kind of corruption

37:22

um in just talking about Epstein the financial crimes uh they're very significant and are just sort of a

37:28

microcosm of what has basically been the Looting of the American public for decades you look at people like

37:34

Catherine Austin Fitz and Mark Skidmore who have calculated about 21 trillion dollars of U.S taxpayer money that's

37:39

just gone missing uh from from the house of Urban Development and the Department

37:45

of Defense right it's probably more than that where is it being

37:50

where'd he go where'd it go yeah who took it I remember and it's still happening and now we're having uh the

37:57

standard of life in the US being degraded inflation's increasing the squeeze is on thanks to Manufactured

38:03

food and energy crises and I think a lot of the stuff we're seeing being built for us people are currently perhaps

38:10

unwilling to accept but when they're cold and hungry and desperate you're exactly right I think that some people

38:16

will be more willing you're not improving my mood much

38:21

well you know it's um we have to understand what we're facing in order to you know solve it right and a lot of

38:29

people with it I've been bringing this bell for uh almost 20 years now and saying wake

38:36

up pay attention look what's happening and it just keeps getting more and more

38:42

obvious and at times there are times you just like I how do you deal with it

38:49

um well I'm a mother um and I just uh I have to keep going I don't know I have to keep saying

38:55

something because my kids are going to live in this world right and there are certain things that I just find unacceptable and I think every parent

39:01

yeah proudly does at this point so you know it doesn't really matter anymore

39:08

um and I think also if you're looking at this from like the energetic spiritual level it matter you know

39:14

um we have to keep fighting because what's the alternative and what does that mean for us even after we're gone

39:19

yeah right so let me you know I first ran into you

39:26

um and your work I don't remember where I saw you but you were talking about transhumanism and this is something that

39:33

again I I think I was talking about this in the 90s and saying that's been going on a long time for a long time and

39:40

saying that this is what it life is going to head towards and it's not good

39:45

and we should probably have a conversation now you know we are on the

39:52

verge of this this is happening it it could be faster than ever yeah yeah it could happen 20 25 30 35 it's here now

40:01

yeah explain what transhumanism is and why it

40:06

is so dangerous yeah so I'll just uh probably start with the history of it um so there was a man named Julian Huxley

40:14

he's the brother of the famous author Aldous Huxley he was president of the British Eugenics Society the United

40:20

Nations has created um after World War II he is put in charge of UNESCO

40:26

in writing his vision for UNESCO Julian Huxley says about Eugenics we need to make the unthinkable thinkable again ten

40:33

years later he coins the term transhumanism in a book did he read his brother's work

40:40

um I'm sure actually that Aldous Huxley's work was influenced by the type of social milieu he inhabited it would

40:46

include his brother and uh you know sort of that those intellectual circles

40:52

uh where both of them grew up right you know this is the British aristocracy and really a lot of the idea of eugenics

40:59

going back to Francis Galton and you know Darwinism and all of that he seems to sort of emanate from from their

41:05

Fabian socialists yes yes um so in a book in 1957 I believe

41:12

called new bottles for new wine something like that Julian Huxley coins the terms transhumanism and talks about

41:18

how the new Eugenics is going to be merging man with machine so this is basically Eugenics rebranded

41:24

and a lot of people that funded Eugenics causes of the past like the Rockefeller family or you know big proponents of

41:32

transhumanism today and it's it's getting uh increasingly problematic

41:38

um I would say you know if you look for example at the new head of the FDA who very few people have bothered to look

41:44

into Robert Califf he's the former Google Health executive Google Health has a

41:50

joint venture with GlaxoSmithKline called Galvani bioelectronics I think

41:55

the former head of that was monster of silaui who was in charge of operation warp speed and their focus is what they

42:01

call bioelectronic medicine which is uh you know injectable

42:06

nanotechnology that can manipulate your central nervous system what are the implications of that we have the person

42:11

that just purchased Twitter making a brain chip company he's also a major contractor to the US military he has a

42:19

major conflict of interest with a Chinese Silicon Valley equivalents like 10 cent

42:26

um and you know he says I love this he says that's one of the reasons why I want to get off the planet

42:32

he says his work is to find a way to a compete against the transhumanistic you

42:41

know Folly um uh you don't believe that at all I don't I don't buy it no if you look at

42:48

that company they had animal trials many of them of the monkeys that was tested

42:53

and died after the brain chip was put in if that were my company I would

42:59

reformulate everything or shut it down if it was going to kill that many animals but it's already moved into

43:04

human trials I mean even though it's killing all the monkeys well it killed many monkeys yeah I forget the exact

43:09

number but a significant portion it's see I this is where it gets frightening well it's tied up with depopulation

43:16

right you have this being sort of the new uh path of eugenics and so you know I don't think these people ultimately

43:22

care about you know how many people are left right smart and right well Eugenics

43:30

is you I mean well people like to act like Eugenics disappeared and it hasn't it's

43:35

just rebranded and if you look at the history it's it's very clear and it's very disconcerting that's why everything

43:41

you're seeing that is coming out of policy all over the world ever all of

43:46

the all of the world economic forums seem so the the medically assisted death

43:52

originally it was going to be for terminally ill people now people are pitching it to homeless people in Canada saying you're too poor to live do you

43:58

want to kill yourself um how do we not remember what happened

44:06

last time well I think some of these people you look at the Rockefellers they funded what happened last time yeah

44:14

a lot of that uh money that was used to set up the Nazi Eugenics program came from the Rockefeller foundation and that's a matter of record they've tried

44:21

to go back and say oh we're sorry but they're funding a lot of this stuff now okay so

44:27

um I think you're getting the impression that maybe maybe you should prepare maybe you

44:35

should help with a parallel economy we may not be too far away from being

44:43

able to undo some of the damage that has been done

44:50

but it's going to take all of us doing our part we got a vote we have to stand for the

44:55

truth we have to be a little bit more like our guest Patriot mobile is America's only

45:01

Christian conservative conservative mobile phone provider they have been a force for conservative values and when

45:08

you're with Patriot mobile a portion of your bill goes to fund conservative causes and candidates who believe in

45:14

things like the sanctity of Life freedom of speech and the Second Amendment values that made us the greatest country

45:19

on Earth in the first place their family and their business plans are affordable and they have the same great coverage as

45:26

the major carriers because these days everyone is on the same set of cell towers and when you add on top of that

45:34

fact that you're supporting shared values you're winning

45:39

when Patriot mobile.com back do it now Patriot mobile.com slash back or call

45:45

972 Patriot make sure you get free activation with the offer code back

45:53

you've read IBM in the Holocaust I haven't read it but I'm familiar with the relationship so

45:59

um he's a good dear friend of mine and uh you know it's the same thing it's the

46:04

same thing now giant corporations are in bed with all of this stuff and uh

46:10

someday they'll be hiding it and go no no we didn't do anything with that but I don't know if I don't think they even

46:17

have to now I mean if it really gets the transhumanist point and they can just manipulate um you know this is an attempt to

46:23

manipulate Consciousness yes really really so in memory and all of that I

46:28

mean they don't have to even bother with it anymore uh once it gets to that point

46:34

I talked to Ray Kurzweil once and and I said you put the nanotech note just help me out here Ray I'm a science fiction

46:41

writer you put the nanotechnology into me and you control it not me you control it and

46:48

I start speaking out about things that you and the powerful don't like why don't you just turn me off why don't you

46:55

just oh you know what and all that nanotechnology and I just die

47:01

sure and his response was because we wouldn't do that yeah let's

47:07

trust us how has that gone for the you know past hundred years or so right and

47:12

if organized crime are the people in charge are you going to trust them I mean they want us to trust in them if

47:18

you look at the world economic Forum or even in the bite Administration and a lot of their policy documents they're

47:23

one of their main focuses on our rebuilding trust with the public and it's not working yeah it's not but they

47:30

may be looking at drastic interventions to make it work and I think you know if we're transhumanism to uh be sure

47:37

shorehorned uh shoehorned through you know that could happen and if you're seeing this

47:42

um you know the sort of these mergers uh because there's many of them of Silicon

47:48

Valley companies and and big Pharma you know they're framing it as Healthcare but it's Eugenics Being Framed as

47:54

Healthcare and it's uh it's really terrible I mean it's terrifying it's

48:00

crazy there's a lot of words for it but you know ultimately uh it has to be stopped and unfortunately covet has set

48:05

this precedent where it can be mandatory or where you can lose your livelihood where you can you know not be able to

48:12

travel you can basically be placed under house arrest unless you agree to it if you don't I mean in the grand scheme

48:19

of uh where we've all been upgraded we're all part of the upgraded yeah I

48:25

don't think that's the intention that's how they're selling it to people if you look at this for example the British Eugenics Society where a lot of this

48:31

came came from you look at someone like H.G Wells best known as a science fiction writer but also a a value

48:36

Genesis he predicted that in a 100 to 200 years there would be two human races

48:43

there would be the um upgraded augmented Elite who were intellectual and

48:49

attractive and you know we're the ones that did everything and then a dwarf-like troll like squat underclass

48:57

that eats bugs ah and uh you know for people that have

49:03

been paying attention it seems like you know they're selling this is as one way it's all going to be a Utopia utopian uh

49:12

thing if we all upgrade I mean that's how it's Being Framed right but if you look at how these people think they

49:19

don't want that they're looking at feudalism and how do you create a class of slaves that cannot even cognitively

49:26

Rebel ever again it is why I mean it you know these teachers unions said oh we we

49:34

care about you know minorities and everything else they did more damage to a whole generation of minorities more

49:42

than they did kids in general into the yeah into the

49:47

gears of the machine I live in South America the lockdowns there were brutal everyone was under house arrest

49:54

basically you were only allowed out of your house twice a week with papers that you had to show to police you each paper

50:01

was good for like roughly three hours and my daughter goes to daycare she's

50:08

four and she was thankfully you know shielded from a lot of this and was able to have interaction and stuff but a lot

50:14

of kids weren't and a lot of kids for age and younger are non-verbal they scream like instead of talking I mean

50:21

they can they're it's it's it's devastating and the fact that these

50:26

people you know act like it was for the children or for public health when you know the evidence increasingly comes out and it wasn't you know it was it was for

50:34

something else and I think we're you know it's increasingly becoming clear what that something else is and was

50:44

what we're doing to farming the the the the the

50:50

ESG and World economic Forum plan is evil I mean I I don't I mean it seems an

50:59

overused word and it's one I swore off about five years ago I said I don't want

51:05

to call things evil because it it has to be evil is a different level but when

51:10

you're talking about controlling and dumbing down and enslaving and

51:17

destroying I don't know what other word to use for it and they've gotten away

51:23

with saying this this is conspiracy theory conspiracy theory well they just you know I think that's you know since

51:29

the the term really entered the American vernacular after the assassination of John F Kennedy it's been used to

51:35

basically claim that if you think powerful people get together to discuss how to advance their power and keep it

51:43

um at the expense of everyone else and that they have any agency um you know you're crazy it all has to

51:51

be a coincidence you know they have they never have any bad intentions the people that you know are the oligarchs that you

51:57

know fund our politicians and have ties with intelligence and have monopolies and you know uh

52:04

the technology that runs our lives and stuff like that I mean it's um you know I think at this point you

52:09

have to be quite naive to think that's actually the case but um so how do people like the

52:16

um New Governor I think of Alberta is standing

52:22

up against ESG and the first thing one of the first things she said was anybody that brags about how they have controls

52:30

and people in every government uh leaders office if not the leader

52:37

themselves I don't think we should be doing any business with them and ESG and World economic forum is out

52:45

um how does somebody like that survive somebody like Klaus Schwab

52:53

you know I think you know it's not just Claus Schwab I think cloud Schwab is sort of a man who is there to facilitate

53:00

I mean let's talk about the world economic forum for a second and what it is and what it's not they describe themselves as the premier promoter of

53:06

public-private Partnerships for lack of a better word that is fascism so

53:13

um then you have the family history of Klaus Schwab that his father ran a Nazi model company and funded the atomic bomb

53:18

and all of that and just very complicated stuff there and you basically have him being in this

53:25

position where he's promoting uh you know fascism on a global I mean he's a white kitty cat away from being a James

53:32

Bond Superman well but I think that's you know they want everyone to focus on him and think that it's just him and just the world economic Forum there's

53:39

other organizations that are promoting this too and also a lot of the you know the young Global leader program that's

53:44

not exclusive to the world economic Forum you know there's lots of other institutions with similar agendas

53:50

uh you know that uh sort of are related to the world economic uh Forum which

53:57

seeks you know not just public private Partnerships and fascism but uh Global governance you know there's a lot of

54:03

these organizations seating their people in in certain places

54:08

uh so how do you you know fight against this I think uh there are sort of like factional infighting uh to an extent and

54:16

it's really hard to know um how that's going at any given time

54:21

um but there's an obvious effort um by powerful interest to stop uh

54:27

nationalist politicians from reaching the highest level you think and yeah I

54:32

well I think it's pretty clear yeah yeah so um you know how do they stop that I don't know I mean unfortunately look at

54:38

the world economic Forum a lot of the banks are very involved and when you you know are in bed with the banks and the

54:45

banks are in bed with you um it's it's very hard to go against that in today's world

54:51

and you know they're making it uh even harder on the little people people in Canada that protested with the the you

54:58

know the trucker protest they were de-platformed not from social media but from the financial system and I think

55:04

that's going to become increasingly common it's already happening to a lot of people that I work with taken off of PayPal uh having trouble with their

55:12

their Banks venmo I mean you know sure and I think that's gonna you know become

55:17

increasingly commonplace and that's how they're going to try and force compliance and you know a big part of this you have to move towards the

55:23

Central Bank digital currency and all of that at the same time which is programmable money the state decides whether you save or you spend they

55:29

decide what you can and can't buy and all this stuff and all the central banks even on the you know in places like

55:36

Russia where Vladimir Putin talks a good game about nationalism and protecting our culture they're going full steam

55:41

ahead with that too it's the way you control a population yeah and I think all these governments

55:47

are really interested right now on domestic control so what does America look like at the

55:53

end China that is the goal of a lot of people at the highest levels of Silicon Valley in

55:58

our government I would say look no oh sure I I have friends who are industrialists and

56:06

they would say to me 30 years ago China's the new model and I thought that's a bad model we

56:14

don't want that they would just flippingly just if China's the new model it wasn't until 10 years later that I

56:20

started going wait a minute they mean that sincerely that how it works there

56:28

all of it is coming here yeah that's your plan for a long time we talked about China Gate

56:34

earlier the origins of Silicon Valley are in that whole mix and a lot of the most powerful

56:40

people in our military industrial complex including like Lockheed Martin were involved with that and wanted that

56:47

sensitive technology to go to China and undermine our national security they're looking there's something there was

56:54

something going on there then and I think we're increasingly seeing it now um I wrote an article in 2020 about the

57:00

National Security Commission on artificial intelligence they basically say that in order to be competitive and

57:07

artificial intelligence and secure economic and Military hegemony for the United States we have to go beyond China

57:14

in terms of their implementation of surveillance technology the use of artificial intelligence moving away from

57:21

private car ownership which they refer to as a legacy system in-person doctor visits to the AI powered alternative

57:28

this was in 2019. before coven covet comes along two years before that

57:34

I talked to the chairman of the board of General Motors and he told me by 2030 we won't be making cars as you know them

57:41

today we'll be making fleets yeah because people Uber yeah it's uh you know Ubers you rent and you can't

57:47

control where they go and they're only going to be in the smart cities you're not going between cities anymore no more

57:53

road trips no more you know you decide oh I want to go over here today I want

57:58

to drive three hours to see my family or whoever my friends that's that's over if these people win and the National

58:05

Security Commission on AI was run by Eric Schmidt former head of Google one of the the co-chair was a very top guy

58:11

that works closely with Schmidt that was at the Department of Defense and it's uh the intelligence Community the military

58:17

and Silicon Valley and those are the people increasingly running the show and

58:22

they think if we don't go beyond China's surveillance a system it's Mega City Smart City model

58:30

we will fail and then you have people like Elon Musk coming in and saying I'm going to take over Twitter for free

58:35

speech and then he also says I want to make Twitter into basically like WeChat which is you know and basically a

58:42

surveillance app to use in China that's for uh your finances your social media all pretty much everything

58:49

is on that app they even call it the everything app and that's his model and the parent company of that 10 cent is

58:55

one of Tesla's shareholders and you know most active advisors

59:02

so is that data going to stay you know that he's going to get from Twitter the new Twitter when it becomes a WeChat

59:09

equivalent is where's that going to go I mean there's a lot if you look at um you know the China connection here

59:15

it's you know when I was writing before I wrote the book I didn't realize the extent of the overlap but it's very

59:22

concerning uh you have people with major conflicts of interest running our national security policy on things like

59:28

AI that have conflicts of interest with China and they you know Eric Schmidt just wrote a book with Henry Kissinger

59:33

and these guys basically argue in order to avoid a war a cataclysmic war with China we have to make good and cooperate

59:40

with China and the model for that is basically you know the world economic Forum I mean they argue the same thing

59:46

Global governance and technocracy um following the China model here

59:52

and it's very against every Everything most Americans are accustomed to but

59:58

they're I I guess finding ways to manufacture consent for it whether the justifications climate change it's covid

1:00:05

it's a food and energy crisis that's been manufactured um you know whatever they can whatever

1:00:11

will stick they'll use but the problem is you're having the people that control Silicon Valley behind this they control

1:00:17

where most people get their information where most people socialize today and they're increasingly censoring people

1:00:24

from platforms they're waging basically a war on dissent that I've written about a few times and it's getting you know

1:00:31

increasingly orwellian to the point where you know they'll label you misinformation or you know this is disinformation uh but you know the Biden

1:00:38

Administration if there were in domestic Terror advances the way they've written it out you say the wrong thing or you

1:00:44

disagree with the state even or the official narrative you're uh you know inciting violence you're potentially a

1:00:50

domestic violent extremist right um and that's happened in history before not necessarily the United States but

1:00:56

other countries and you know it's pretty clear that once that type of policy gets implemented things go downhill very

1:01:01

quickly do you have hope at all that the if the Republicans could win it at

1:01:11

least slows it down I mean I think people in the Republic there's there's clearly people who go to Washington and

1:01:19

actually believe it and then are turned uh or they go to Washington they're

1:01:25

already a dirt bag and they know what they're getting into yeah and then there's a few that go and stand and are

1:01:32

trying to hold the line but they're a minority a big money or they get forced out correct uh if I'm not mistaken Ron

1:01:38

Johnson right um was the one that that challenged a lot of covet narratives and I mean even

1:01:43

mainstream media in PR are supposed to be objective says oh he spreads conspiracy theories and his Challengers

1:01:49

a rising star and you know I mean they're very clear about who they favor and who they don't and if they don't want you to win they'll gerrymander your

1:01:56

District they'll do so I mean there's lots of tools and that they can use to prevent you from

1:02:02

from staying in office and who knows what we'll see in the midterm elections But ultimately you know those type of

1:02:10

people that are willing to stand their ground and actually fight for the American people are very few

1:02:15

even in it doesn't really matter what party you're talking about it's very small number when you consider the

1:02:21

amount of votes needed to pass certain legislation so I think ultimately

1:02:27

the way out of this is for the American people to realize that we yes this is a

1:02:33

fight between good and evil but if you're looking for the good guys stop looking at people that are put on the TV

1:02:39

screens in front of you and start looking at your neighbors yeah and the answer is so clear

1:02:45

local local local local absolutely and this is really US versus them it's not left versus right anymore

1:02:52

we are so far beyond that yeah uh really and it's amazing and very heartening how

1:02:59

many people that I know and I interview that um

1:03:05

we would have we would have been against each other 15 years ago we would say oh you're and now it's like no no no forget

1:03:13

Oliver forget all of that yeah you know and it's heartening that people are

1:03:19

waking and starting to come together question is do we make it fast enough

1:03:26

I've been saying for a while this is going to be a photo finish I don't know which one's gonna I don't think anyone

1:03:32

really does and I think it comes down to how much responsibility people are willing to take for their own lives and

1:03:37

and you know how how far communities are willing to go to ensure that they're self-reliant and what does that mean to

1:03:44

you well if the banks are deep platforming people you can't use their financial system are you going to go to the cbdc

1:03:51

land where eventually you won't be able to spend money without like a microchip in your hand and all of this stuff you

1:03:57

know there's obvious red lines people can't cross how are you going to feed your family how are you going to keep your house heated in winter you know

1:04:04

basic needs I think we should probably be taking some lessons from the Amish to be honest I think right you know

1:04:13

that the Amish they're going to be fine they're gonna be fine we have

1:04:19

we have outsourced our needs to corporations that want to enslave us so

1:04:25

we have to start producing our own stuff at a local level it's all about exit and

1:04:31

build and that's what we have to do and the more people that do that um the better off we will be the real

1:04:37

question is how accustomed are Americans to convenience and will we be enslaved

1:04:44

by that convenience or not and I think that's the ultimate so far we have been a lot of people have been yeah

1:04:49

um talk to me a little bit about Bitcoin um so I'm you know not necessarily

1:04:55

um uh well-versed on cryptocurrency I do um uh I like bitcoiners because we

1:05:02

tend to have a lot see a lot in common about um you know the state of government today and uh the Federal

1:05:08

Reserve for example Central Bank Central Bank digital currency um and all of that but you know because

1:05:14

I'm not particularly well versed in it I don't like to tell people how to spend their money it's a very individual decision

1:05:20

um you think it can survive uh I think the central banks the bankers and the

1:05:25

government will do everything they can to prevent a currency that threatens their power from actually being able to be used and I think we're already seeing

1:05:32

major efforts to make that the case you know they can make it illegal to uh you

1:05:38

know turn it into something else illegal to use is tender you know they they're looking at a lot of different

1:05:44

options um but you know some bitcoiners despite that think is totally possible but I

1:05:50

don't think I'm horrified to talk about that um you know I personally have you know um in terms of my finances like you know

1:05:57

some people donate to my work in crypto I have a little bit of that but you know I'm personally looking at trying to put

1:06:03

as much of my money as I can and things that will keep me and my family self-sufficient come what may uh which

1:06:09

in my case included like investing in land so I'm not renting I own where I live I have enough land to produce what

1:06:15

my family needs in terms of food stocking up on things that I can't produce

1:06:20

you know things like that that's where my money is personally going but I am not in the business of telling people

1:06:25

you know giving Financial advice beyond that but you know if the goal is to have

1:06:31

developed parallel systems so we're not dependent on the systems of the people trying to enslave us you know whatever

1:06:37

you think is a good way to get from point A to point B uh you know that's probably where your money should be

1:06:42

going if bitcoin's a part of that if you feel that way good for you and if not you know good for you too I think

1:06:48

ultimately what we need to do is um uh try and create something so that we can

1:06:54

be resilient and not have to uh I mean because the system is just so unacceptable

1:07:01

uh I mean it's an it's really not just in in it's not just against freedom and all sorts of other values right it's

1:07:08

just it's against nature it's against life really and so I mean if you're

1:07:13

going to support that you know I think people have to realize the consequences that come with that and exactly what it means

1:07:21

when you are are willing to give yourself over that kind of system the implications of that and I think a lot

1:07:27

of people don't really realize that or take the time to think about it and I think they should

1:07:32

are you God driven you is God a center of you yeah but I tend to think of maybe God

1:07:39

differently than most Christians I don't really see it as a person or as a man I see it as uh maybe the universe or the

1:07:46

creative Force right uh you know the energy uh that drives George Lucas and

1:07:52

the force I mean there's a lot of different ways you know to look at it but ultimately if you're looking at

1:07:57

Humanity what do you like about Humanity it's all the it's the creativity it's uh

1:08:03

the vivaciousness you know that's the stuff that I think we're fighting for uh and you know uh a lot of the guys behind

1:08:10

this want to to eliminate that I think a lot of transhumanism is aimed at creating like a drone-like Workforce

1:08:17

that will never be able to challenge their working conditions or ask for a bigger piece of the pie and it's amazing

1:08:22

to me that more people on on the left don't see that if they're all about workers rights and unionizing all right

1:08:28

you have a chip in your brain how's the how's you know workers rights going together how is Union

1:08:34

how are the unions in bed furthering all of this well I would say

1:08:39

that you just have to look back to uh the unions you know back in the 20s and 30s and 40s and how organized crime took

1:08:45

them over and that's really changed um so the big ones I mean you know um so it's um you know a lot of those

1:08:52

guys over the years have evolved to support these types of of policies because it's more control and money and

1:08:58

what does the mob love more than anything else right what

1:09:04

why is the left you know

1:09:09

I've always held libertarian more libertarian views when it comes to social issues I don't care who you marry

1:09:15

I don't care what you do I don't care who you love there's no no business of mine shouldn't be any business of the

1:09:21

government you know that was a progressive idea to have a marriage license from the government

1:09:27

um but we fought this and I remember saying to my my daughter who was in college at

1:09:33

the time she said Dad it's about love and I said I don't think it is I think it's about control and this argument if

1:09:42

we play it out you can't stop polygamy can't change one factor without changing

1:09:49

other factors and everyone said these things were crazy we we are now

1:09:56

transitioning kids because there's no gender identity

1:10:01

anymore we are sexualizing our youngest kids

1:10:08

what where is that coming from it's such a force if your ultimate goal is total

1:10:16

control you need to have a population that has no national identity that has

1:10:22

no identity period that that identity can be fluxed and can be moved whenever

1:10:27

convenient for the people on top if people have an identity and know who they are and know where they stand they're a lot harder to control and I

1:10:34

think if you make all of that fluid um at every level uh it's a lot easier to exert your will

1:10:43

over them because you know they they don't have their feet firmly on the ground right

1:10:51

I thought of this several times during this podcast I think this is the most impowerful interview I've ever done well

1:10:59

thank you yeah I mean I I hope people listen and

1:11:07

open their mind enough to go that can't be true I mean I usually

1:11:12

start my investigations on things going no way it

1:11:18

can't be I don't do that as often now because I'm seeing oh yeah it probably

1:11:24

is yeah um who were you before you started doing

1:11:31

this who I mean did you believe these things or have you found these things going oh my gosh and one leads to

1:11:37

another well I guess you could say that when I was younger in my teen years I'd have made her trust issue with adults

1:11:45

um and I just uh had a hard time I just didn't believe what I was told a lot of the time I had to figure it out for

1:11:51

myself and all sorts of things I guess that's sort of a lot of some teenagers

1:11:56

um are like that but I um you know around the time I was in university the last year or two I sort

1:12:03

of figured out a lot of things about um American history that's sort of hidden from us

1:12:10

um uh the government isn't exactly there to help necessarily

1:12:16

I don't know how we went from hey government is like fire with George Washington saying if you're in control

1:12:23

of it it's good if it's out of control it'll burn you to hey we're from the

1:12:29

government we'll educate your kids how could you possibly think a government is

1:12:34

going to raise kids who say be skeptical of us yeah well it's not you know look

1:12:41

at who has taken over education system you go back to things like uh the Rockefeller family or their role in

1:12:47

healthcare there's a lot of oligarch families that have very specific agendas that have really taken over government

1:12:53

policy and it's been like that for a very long time and they're not elected no one put them

1:13:00

in charge actually a lot of people used to hate the Rockefeller family until uh you know they started a major PR

1:13:05

campaign to Rebrand themselves as philanthropists that a lot of other unpleasant people have since followed

1:13:12

um and uh you know the long-term consequences of that we are seeing today

1:13:19

um but anyway um in terms of my background you know I was you know 21 22 and just looking

1:13:25

around you know I'm 33 so I'm a millennial right and most people my age

1:13:31

just you know I could see a lot of this stuff like um were too dependent on corporations that

1:13:37

have a lot of nasty uh agendas or do bad things there's a lot of issues a lot of illegal Wars no accountability at the

1:13:44

highest levels of government you know if people my age don't start doing something it's going to get really bad uh and most you know most people

1:13:52

were like stop talking about that I have Netflix and beer so I don't care everything's fine as long as you know

1:13:57

I'm comfortable basically you know screw your politics or screw your concerns and I just uh then wait I left the U.S after

1:14:04

that how can the same group of people that generation

1:14:10

claim that no you have to be an activist you have to be involved in climate

1:14:16

change and you know I'm going to sit down and glue myself to a wall like a uh you know yeah well that's the

1:14:23

activism that's put in front of young people today and they're being told that's what activism is and that that's

1:14:28

the activism that's sort of in Vogue because it's shown and treated by mainstream media as sticking it to the

1:14:34

man these people throwing tomato soup on paintings but you look at those groups I think they're called just stop oil

1:14:39

they're funded by the Getty and Rockefeller families in the family family you know made their money off of

1:14:46

oil but you know they have a long time interest in Eugenics and funding correct

1:14:51

um you know people that basically helped create this sort of new environmental movement that downplays uh pollution and

1:14:59

plays up carbon dioxide and that's all we should be worried about and you know it's human the biggest I think the quote

1:15:06

from the club of Rome is the biggest enemy of humanity is man and for furthering you know that narrative not

1:15:12

that you know it's not the corporations that pollute or even the US military is

1:15:17

you know even by you know climate change metrics the biggest contaminator of you know the planet and all of that it's not

1:15:25

about those guys it's just about the regular people but really what it's about is controlling how much energy

1:15:30

people can use and if you control how much energy a household can use you can control their economic activity you also

1:15:36

control how many family how big their family can get and I think that's ultimately uh what

1:15:42

it's about it's not about the environment for these people and a lot of it is uh you know Wall Street driven

1:15:48

you look at the United Nations a lot of the people they put in charge of a climate change policy you have Mark

1:15:54

Carney a former head of the bank of England and the Bank of Canada I believe uh he's one of the guys that came in to

1:16:00

rescue HSBC when they were caught money laundering for Mexican drug cartels not

1:16:06

exactly a good guy and it's very unlikely that he is driven by uh concern

1:16:11

about the environment and then the other person is Michael Bloomberg former mayor of New York and uh billionaire guy and

1:16:17

so these are the people I'm crafting the solutions and just like covid you don't have time to think about what we're

1:16:23

telling you you just have to accept these Solutions because if you don't something really really bad will happen

1:16:28

and it's the same it's a sort of a similar narrative to what you know was played out with covid and everything

1:16:33

guns cars everything yeah so you know people are being it's it's fear fear

1:16:40

given to get people to accept policies they otherwise wouldn't accept because they're told this cataclysmic event is

1:16:45

just down the line and trust us again is the conclusion of that so you know

1:16:50

there's people that agree with the narrative about climate change and there's people that don't and I'm not

1:16:56

trying to really get in that space when I talk about this stuff I'm trying to point out that the solutions are coming

1:17:02

mostly from Wall Street and they're things like carbon markets they're things like debt for climate swaps which

1:17:09

back in the day used to be debt for land swaps not about climate change you know about other stuff

1:17:15

and then you have people like Larry Fink of BlackRock and Michael Bloomberg and Mark Carney coming together in something

1:17:21

like G fan saying why don't we give Wall Street Direct Control of the IMF and the World Bank

1:17:26

for climate change you know right how can anyone on the left that's worried

1:17:32

about climate change sign up on that why don't they talk about planting trees why isn't Bill Gates the largest like

1:17:37

private land owner in the U.S now planting trees like crazy if he's so worried about carbon dioxide

1:17:43

um you know he he poo-poos the whole idea of planting trees as a way to combat climate change it's just carbon

1:17:49

markets and going to electric vehicles and all of this stuff but electric vehicles necessitates Mass Mining and a

1:17:56

lot of that mining is in places that use child labor or it's going to be so environmentally destructive you totally

1:18:02

destroy the developing World which you know these people on the left supposedly want to protect you're going to totally

1:18:08

destroy the environment I live in the south of Chile in the Andes it's one of the only areas in

1:18:15

Chile that's still like forested and really nice not polluted water any of that most of the mining in Chile is

1:18:21

historically in the north which has become very polluted and has a lack of water among other things and now the

1:18:28

mines are starting to move South because of this demand for more and more minerals for you know

1:18:34

electric vehicles and all of that a lake that used to be used for tourism uh there was some mineral I forget what it

1:18:40

is discovered in the Lakeshore and then the water just disappears one season and now it's ready to be mining right next

1:18:45

to a national park uh I used to live and work in Peru they were talking about putting a uranium mine next to Machu

1:18:52

Picchu and all types of stuff I mean this is uh going the mining stuff is not

1:18:57

being talked about and uh you know electrical vehicles are being marketed as necessary but it's going to come at a

1:19:04

massive massive cost and I think that you know again the environment then the

1:19:10

environmental movement is focused on carbon dioxide if they were really worried about the environment they would

1:19:15

also educate people on how destructive this type of mining is and what it does to the people who live there in the

1:19:22

environment and including in protected areas there's a lot of species in this particular area of Chile where I live

1:19:28

that are only there and they've uh you know been there for thousands of years and they'll not exist if a lot of this

1:19:34

mining goes forward but if you ask people like uh Bill Gates for example if you has a joint venture with most of the

1:19:41

other Titans of Silicon Valley called Cobalt metals they say all of the world's reserves of lithium Cobalt and

1:19:48

nickel must be completely mined if we even want to get close to the electrical vehicle Revolution so that means digging

1:19:54

up the entire Andes including areas that are national parks right now and uh even if they do with all the

1:20:01

reserves that we know that we have you're not going to be able to reproduce the amount of private cars and use today

1:20:07

it's going to be way less cars and so they're just going to be I mean the model's already sort of been out there they fielded it in the UK recently you

1:20:14

can't drive out of your district and all of that stuff it's going to be much more controlled the freedom of movement well

1:20:19

it's not really going to be freedom of movement it's going to be controlled movement

1:20:24

last question are you optimistic

1:20:32

um so that's a tricky question you know it sometimes you're working and writing on

1:20:38

this stuff I mean it's ups and downs sometimes you feel inspired sometimes you're like oh my gosh you know yeah

1:20:46

um you know but ultimately there's really no other way to be except to

1:20:51

believe totally in a better future um I mean we have to be totally committed to that if we're going to do

1:20:57

it and do it quickly and um you know I have a lot of hope uh that

1:21:04

um Americans when when things get really rough will come together at least most of us I think so too you know

1:21:10

um but you know in in the environment we're in right now I think it's incumbent on everyone no matter how

1:21:16

small or big your platform is to speak up about what is happening uh I think we

1:21:21

are past the time about worrying about what people say about you about at work

1:21:27

or at home wherever the president gave a speech last night and he I don't remember what he was calling people and

1:21:33

I thought but that just that is so I so I am so far beyond caring about names

1:21:40

and labels that anybody you know and I I think there are more and more people around the world that are like I don't

1:21:46

care I don't care what you call me I don't care you know what you do I I just

1:21:52

know what's true and I'm just not going there with you well the government wants

1:21:58

to Define what is true and what is not I wrote a recent article um about that in explaining some of the

1:22:04

calls to basically uh make it such um and it's it's you know even if they

1:22:11

try and do that and they try and say this is the state you know the state is defining truth and if you deviate from

1:22:17

that you are inciting violence um and all of that but the problem is people at a visceral level gravitate

1:22:23

toward the truth so they hear it and they're like oh that makes sense or they look at the sourcing or they investigate

1:22:29

for themselves and they realize what is true and what is not so you know the state and silicon Valley and there's

1:22:35

really not that much space between them to be honest at this point you know they can try and and censor and manipulate

1:22:42

and whatever but ultimately people are going to gravitate towards what is true and there's going to be a point where

1:22:48

they're not going to be able to really the tools they have now will not work and I think a lot of that is that time

1:22:55

will come once people stop trying to use these platforms that they are

1:23:00

manipulating and start just going out and talking to people they know we have

1:23:07

to get offline and we have to do it quickly maybe even get back you know in

1:23:12

circulating in print stuff that's printed I mean we really have to stop uh depend being so dependent on these on

1:23:18

these platforms that they're obviously manipulating I think everyone knows about it or they're censoring people from and they're using it to profile you

1:23:26

you know stop giving them your data and start getting in the real world and telling people uh what's what I mean

1:23:33

they may call you crazy but the stakes are too high to not do it that's how I feel thank you my pleasure thank you thank

1:23:40

You
